REMARKS

Claims 6, 12 and 20 remain in the application.

Paragraph 33 of the specification is amended to remove the embedded hyperlink. It is respectfully submitted that the amended specification complies with the requirements of MPEP § 608.01. The underscore is required to indicate added material and is not a part of the amended paragraph. The Examiner is invited to contact the undersigned if the amended paragraph is not deemed sufficient in order to suggest a manner to amend the paragraph to remove the hyperlink.

The claims have been amended to include the terms which the Examiner stated was missing from the claims. Claim 6 now claims "network-agnostic", "implementing in the application layer" and "said user device determining handing off". With regard to claim 12, Oh refers to frequency resource sharing technology (see, summary and figures). This method belongs to the link layer and is carrier-dependent. As amended claim 12 now claims "implementing in the application layer." Claim 20 has been amended to recite "network agnostic" and "implementing in the application layer handing off".

It is respectfully submitted that the claims 6, 12 and 20, as amended, are now in condition for allowance.

Reexamination, reconsideration and allowance of claims 6, 12 and 20 are respectfully requested.
